

## OCN's proposed Strategic Cycle Network for Oxfordshire

This map outlines a possible future 'all ages, all abilities' cycling network for Oxfordshire.

**Primary routes:** Key routes with high traffic potential to be prioritised for 'all ages, all abilities' infrastructure.

**Secondary routes:** Routes that would start as signed routes, and be developed into 'all ages, all abilities' infrastructure when funding allows or development opportunities arise.

**Tertiary routes:** Initially implemented as signed routes on existing roads or tracks with minor investment e.g. to improve junctions. Upgraded to 'all ages, all abilities' quality as cycling numbers rise or opportunistically when funding available.

**All routes:** For all categories the immediate priority is to protect the space for future infrastructure improvement.
